[11.07.18 \(Evan Wortman\) 3rd Party Authorization.pdf](#)

Hi Chris, per our conversation attached is the revised profile for Class II Non-Hazardous Soil for Maloy Landfill. The profile was revised to incorporate the following changes:

- Adding N/A for the state waste code. State waste code is not applicable for Class II waste.
- Classifying the type of waste as a Pollution Control Waste. The previous profile was submitted with an error identifying the waste as an Industrial Process Waste. The waste will be generated by the removal of contaminated soil and meets the definition of a Pollution Control Waste.

The same analytical report and sample IDs have not changed, please let me know if you need the lab report resent or if you need anything else.

Thanks
